The Problem

Silence After Checkout

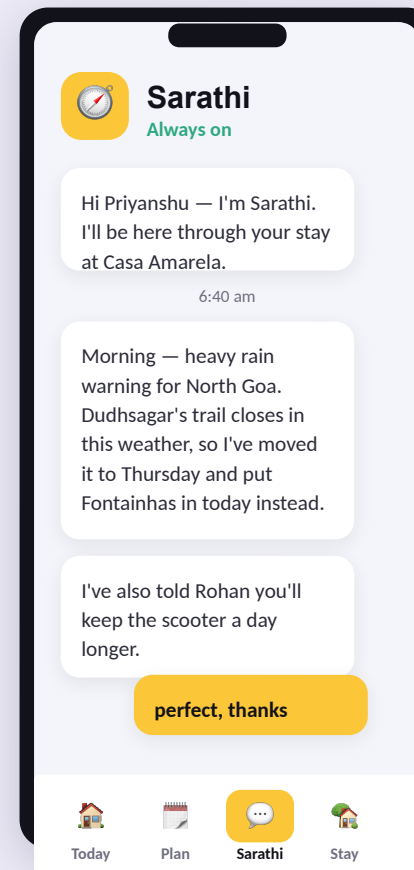

Zero Guests

No Reason to Return

“Booking platforms end their relationship with the guest at checkout — there's no continuity into the actual trip, which is where loyalty and upsell opportunity live.”

The Solution

Sarathi

Acts Before You Ask

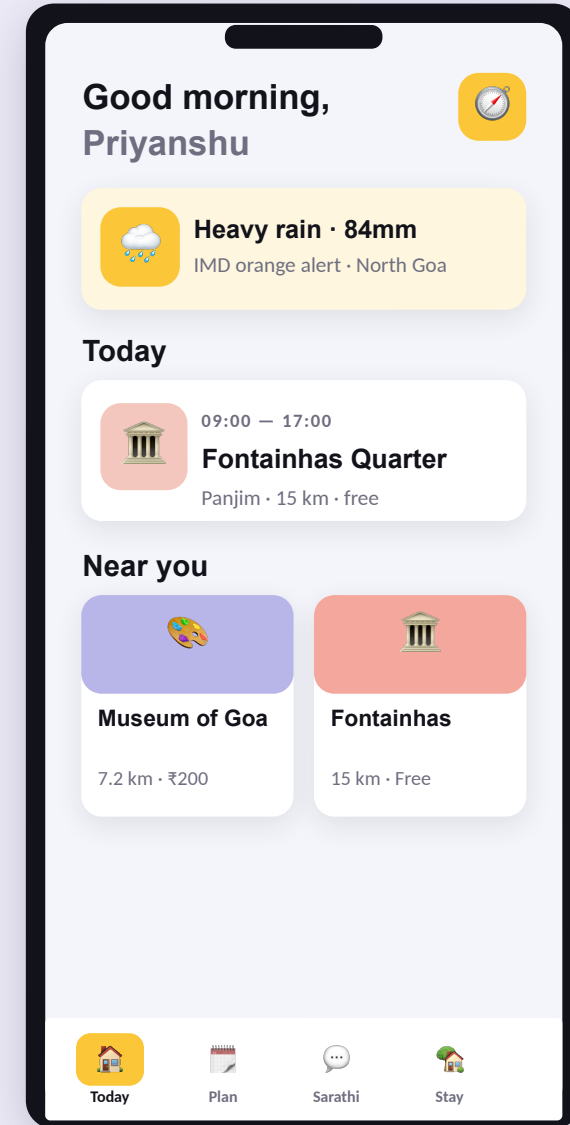

Grounded — Never
Invented

Live Demo

Scan to open the working app

A real tool-calling agent — 7 tools, a 14-place Goa knowledge base, and a scheduler that messages first.

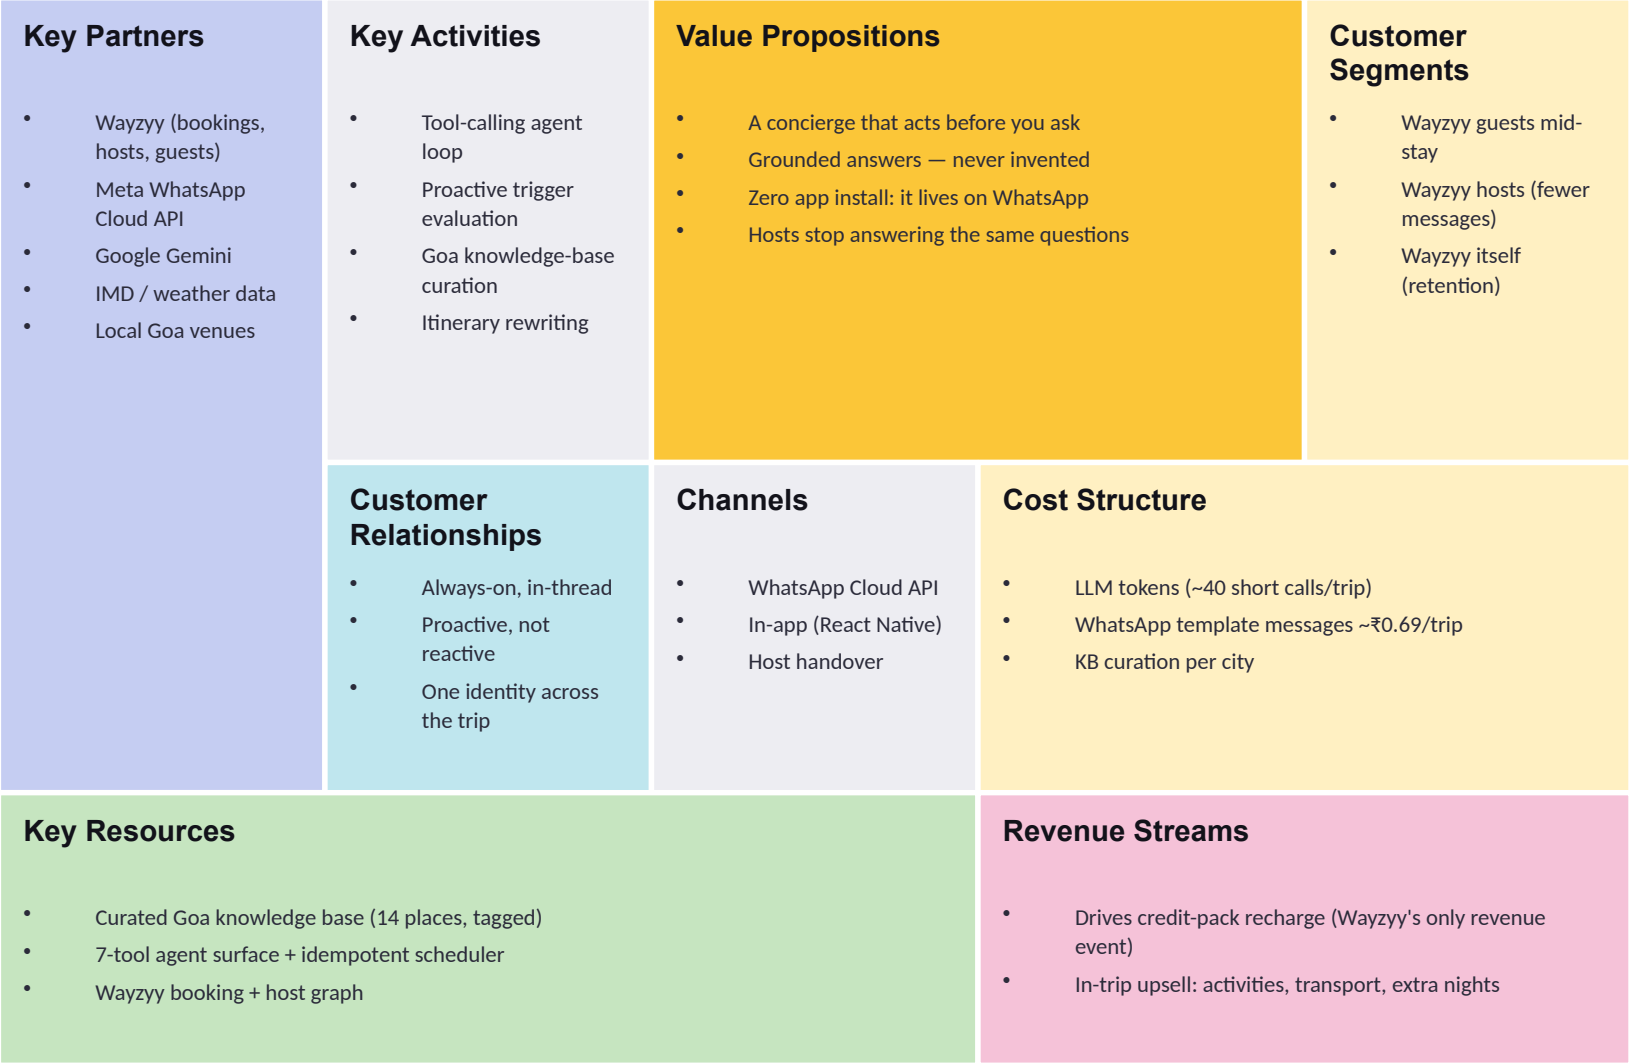

Benefits for Wayzyy

Sarathi Business Model Canvas

In-trip intelligence that turns a one-time Wayzyy guest into a repeat one.

Future Works

Real Delivery

WhatsApp Cloud API — webhook, templates, 24h session window.
React Native in-app surface, matching Wayzyy's stack.

Deeper Memory

Guest profile carried across stays, not just this trip.
Preference vectors reused from our TravelBuddy engine.

More Cities

One dataset per city — the KB is the only Goa-specific layer.
Host-sourced updates plus scheduled re-validation.

Trust Layer

Chat moderation — contact-evasion and scam detection.
Closes the gap Wayzyy published in their own dev challenge.

Building the Sarathi Ecosystem

The Core Engine (Speed & Scale)

Agent Layer

Node.js · Express · 7-tool surface

Tool-calling loop, retry + backoff

Data & Scheduling

Goa KB (JSON) · node-cron · MongoDB

Idempotent send log, trigger evaluation

The Brain (External Services)

Gemini 2.5 Flash

Reasoning & tool selection

WhatsApp Cloud API

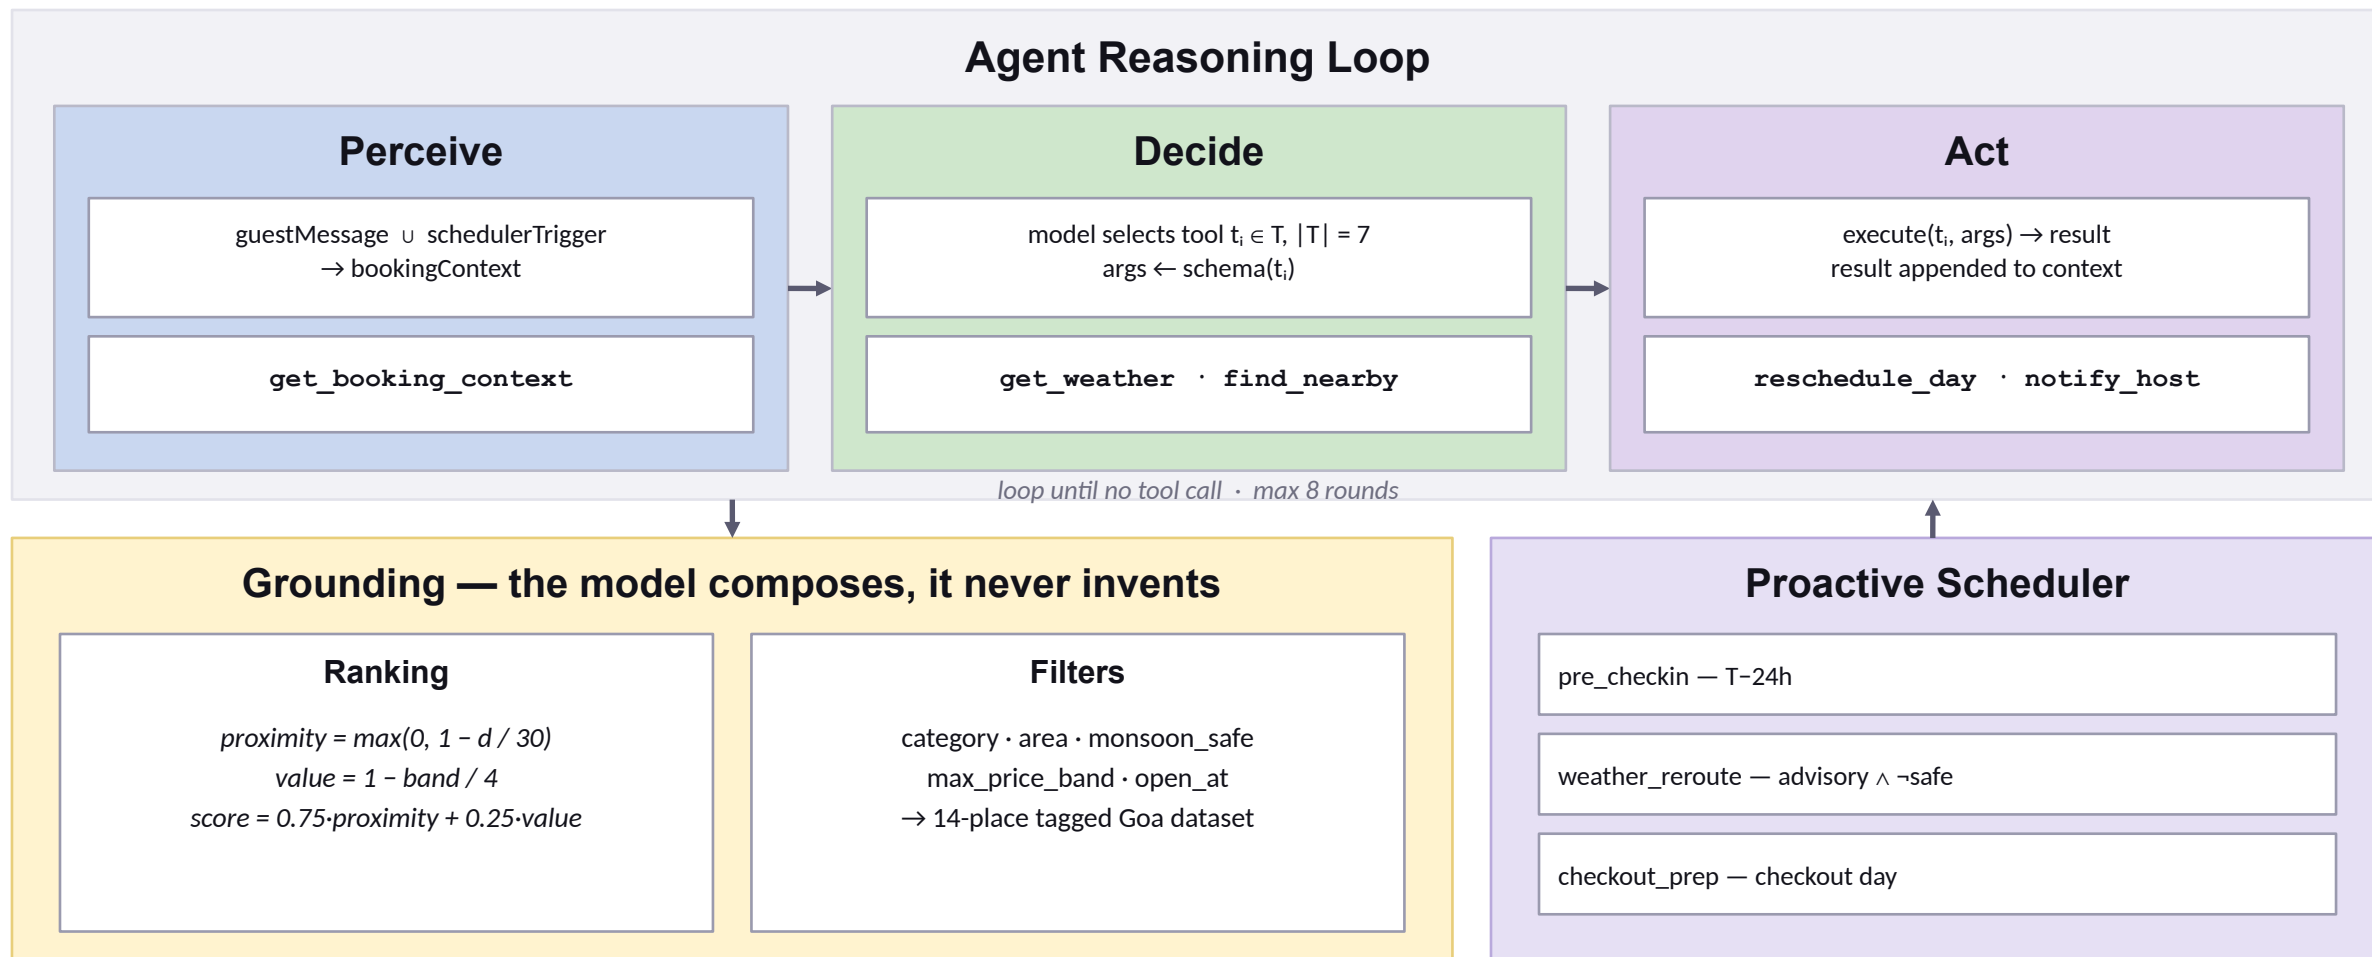

Delivery — free 24h window

IMD / Weather

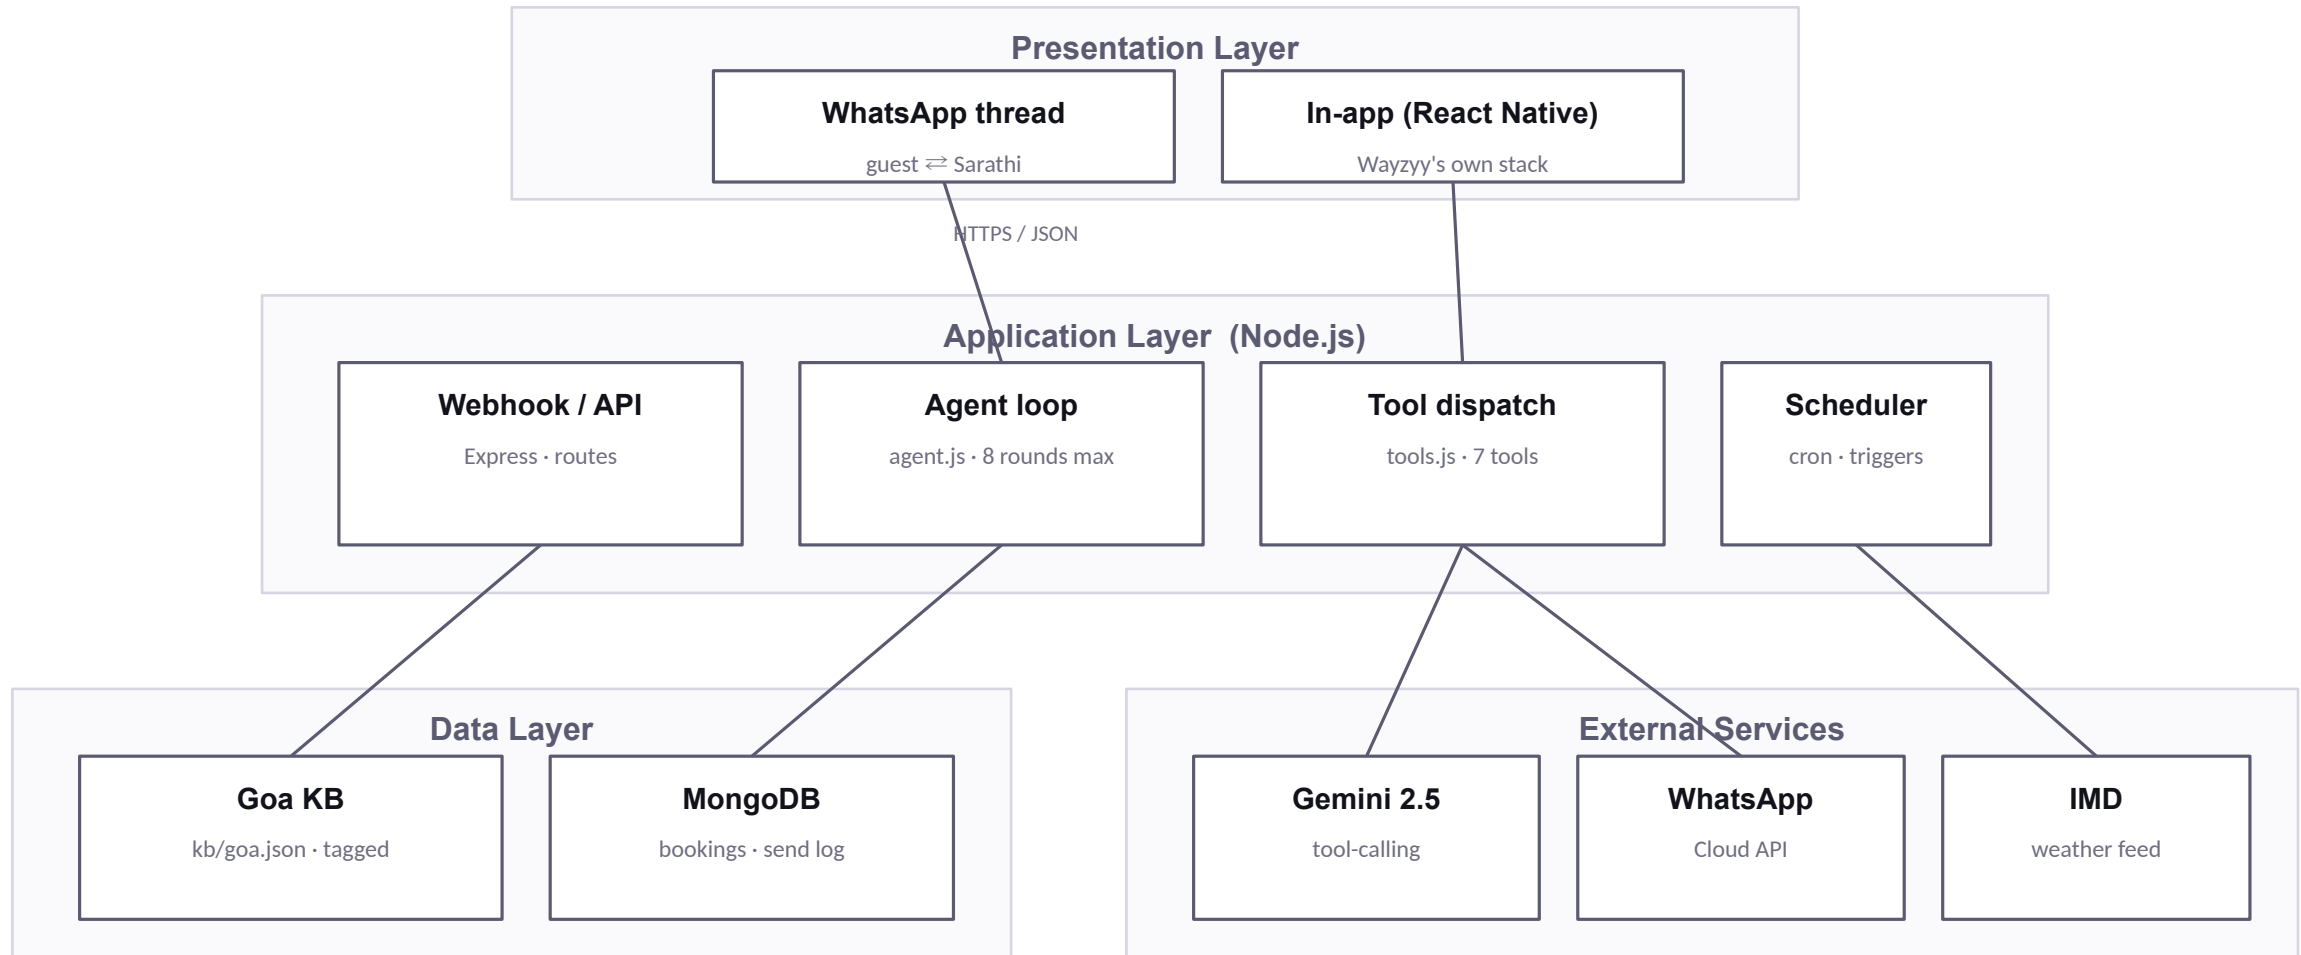

The proactive trigger

TOOL-CALLING AGENT & GROUNDING ARCHITECTURE.

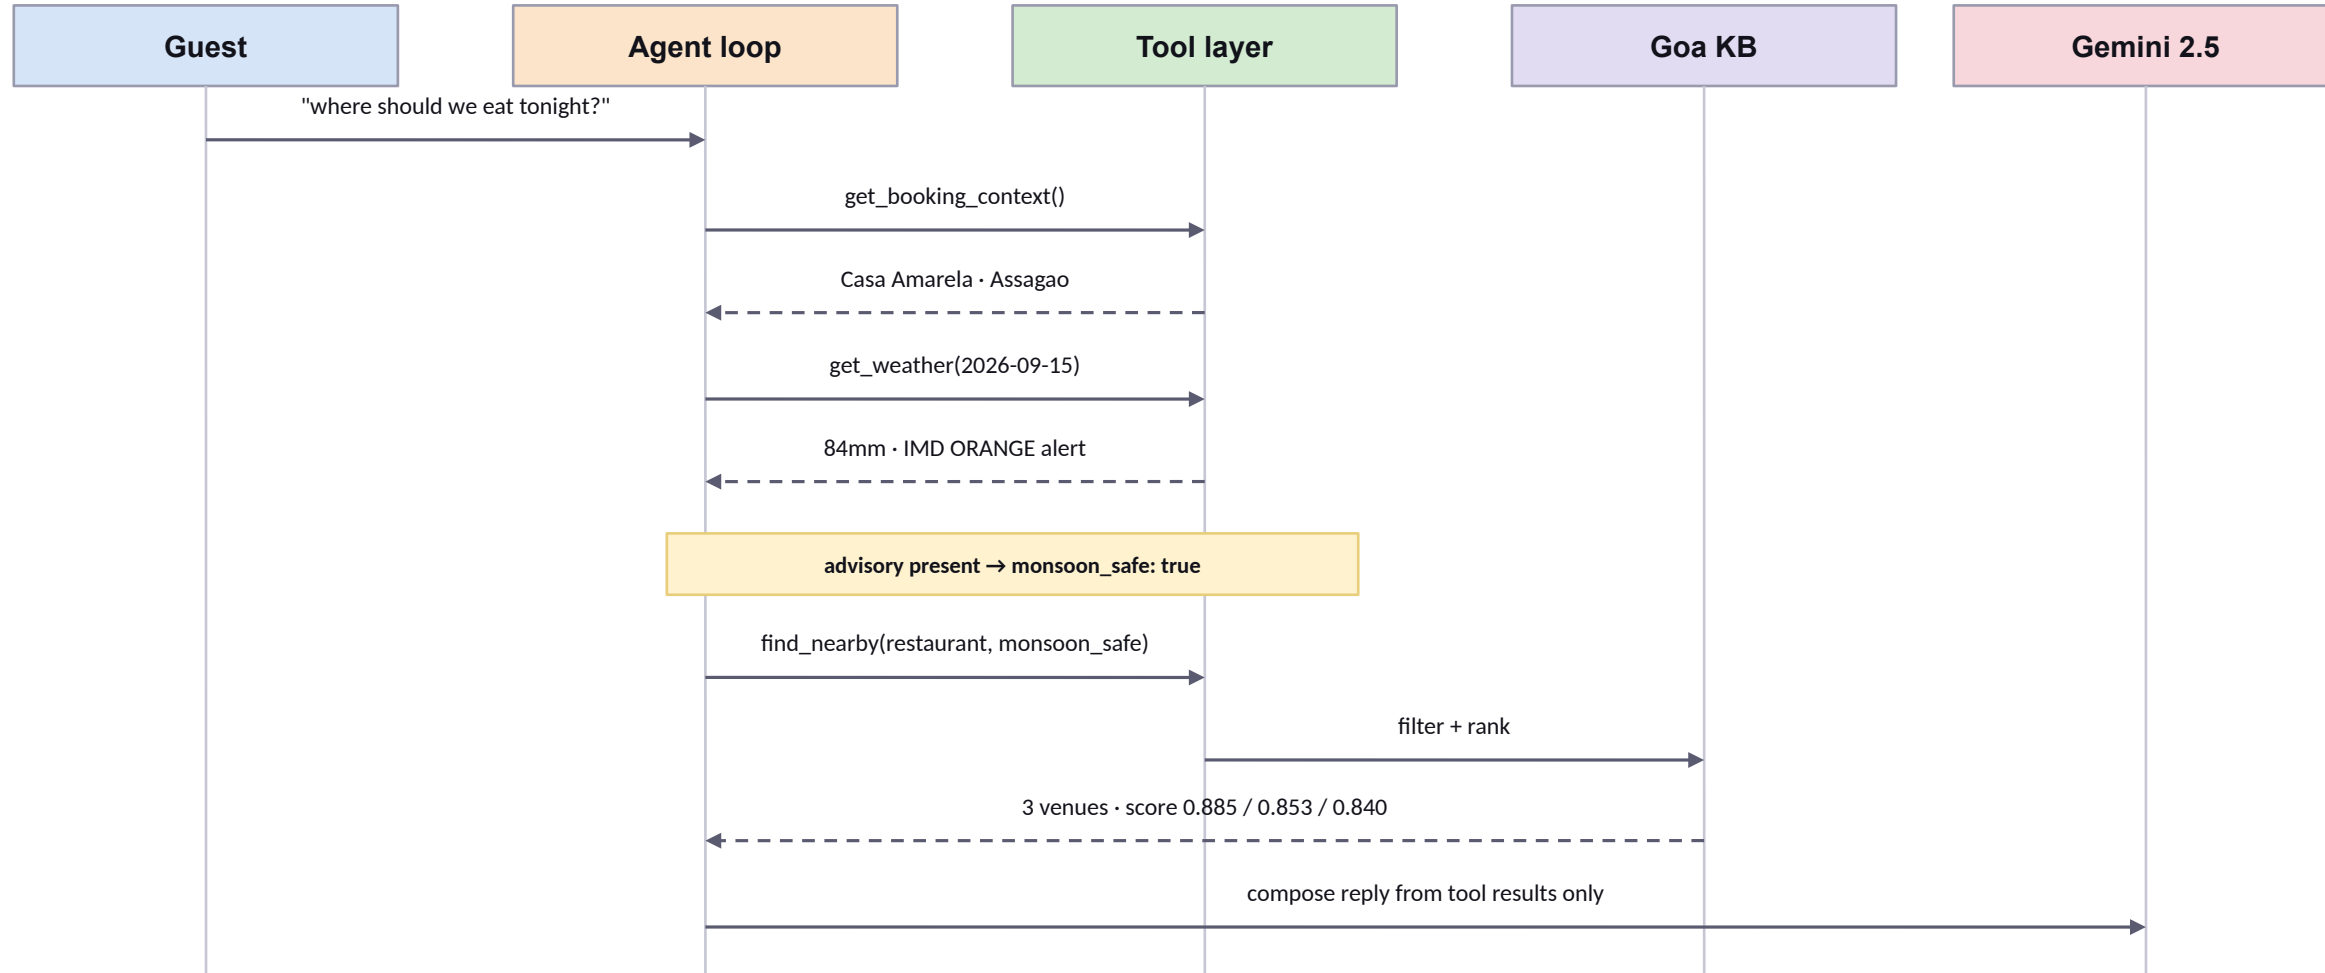

Every venue, price and distance in a reply traces to a tool result. No tool result → no claim.

High Level Architecture Overview

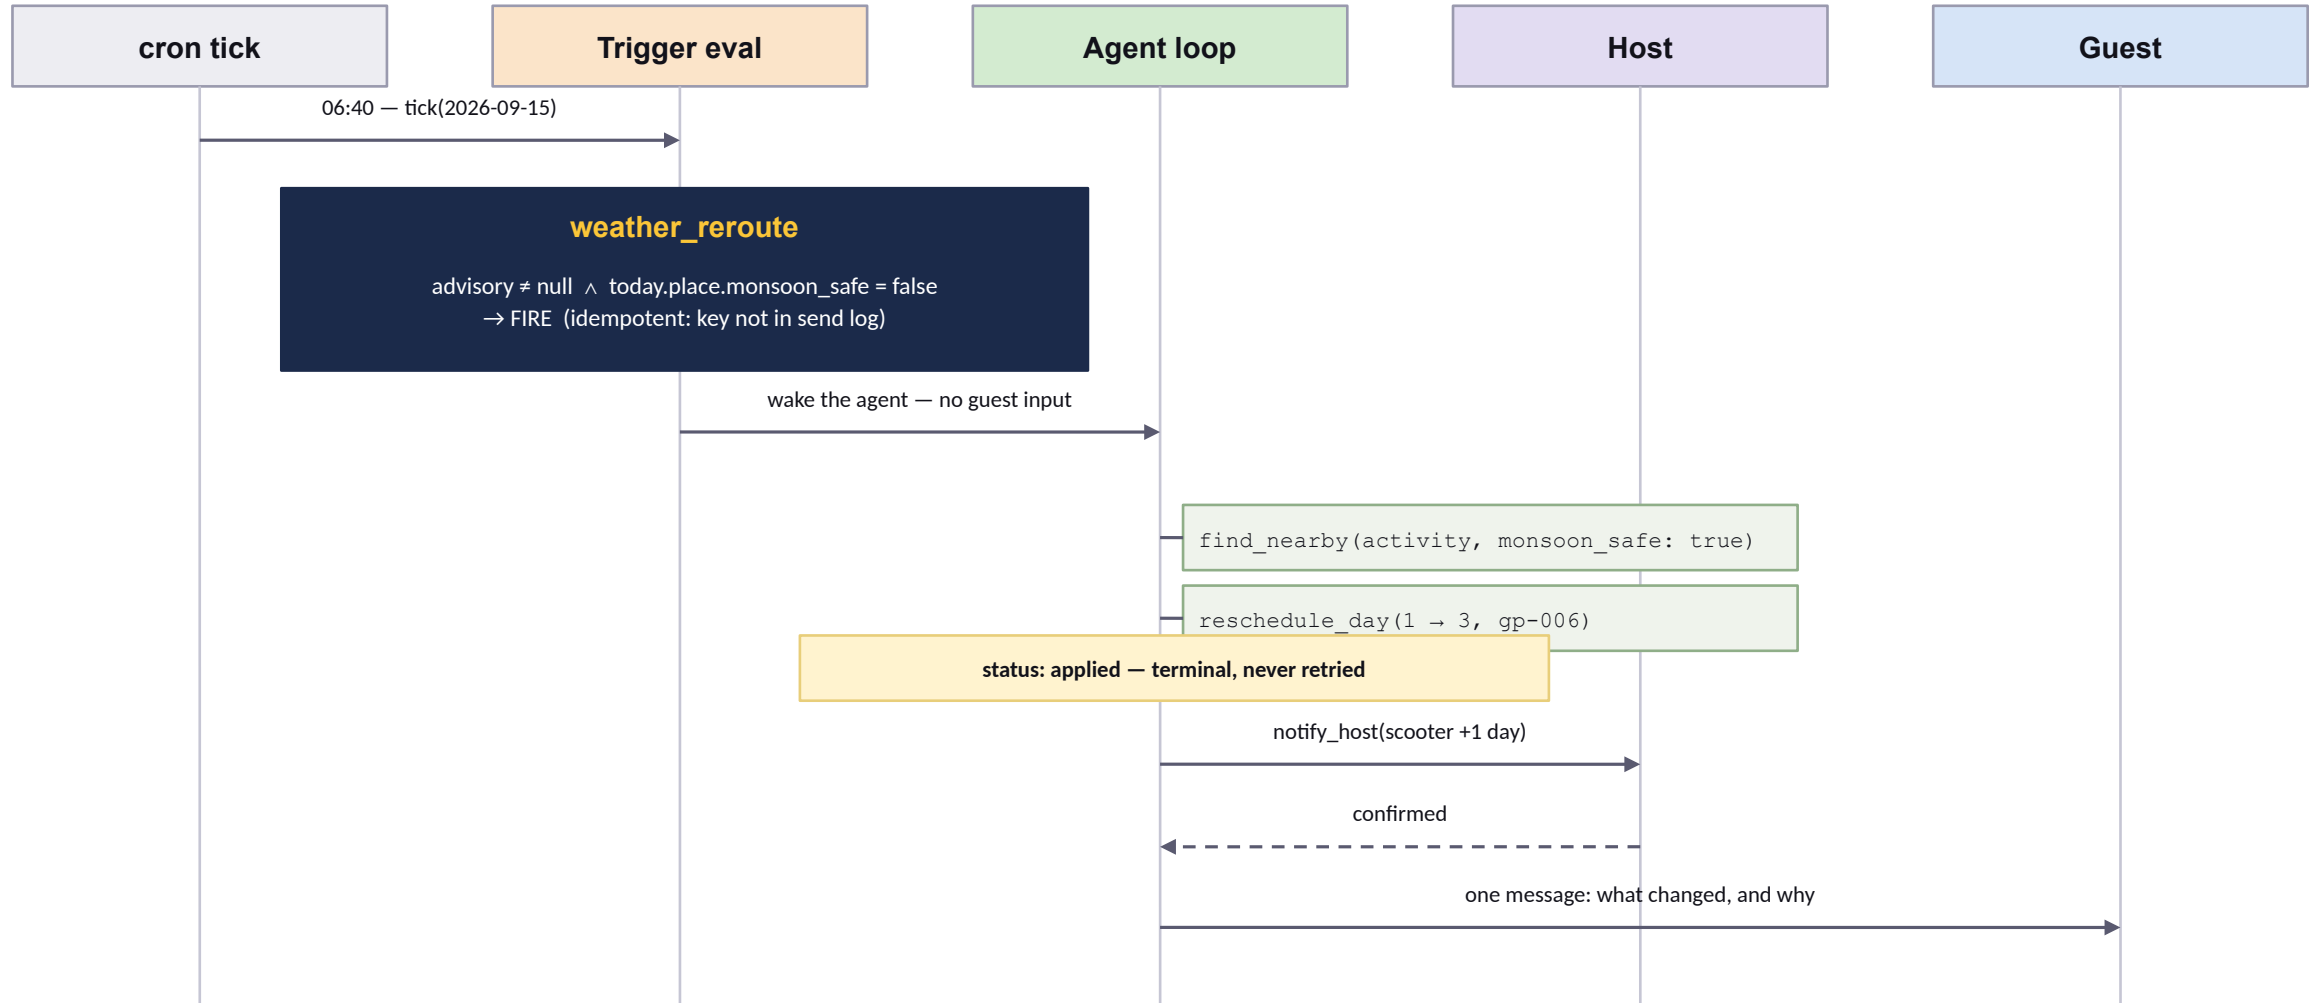

Core Data Flow

Reply: "Gunpowder is your best bet — under a km away, indoors, open till 22:30."

“Nobody Asked” Architecture

Elapsed: 0 guest actions. The plan, the host and the guest are all already updated.
